Please Note

1. Items of relatively wide interest, including introductory and overview treatments, are marked by a pointer (➤) and grouped at the top of their respective sections or subsections.
2. Some entries – usually at the end of the relevant section or subsection – list World Wide Web sites related to the topic. These are aids for additional and ongoing inquiry and do not necessarily have a corresponding printed document in the file.
3. Square brackets around a Web URL mean that the URL was checked during the editing process and was found to be correct at that time. (For example, [<http://www.ca.gov>].) Web addresses (URLs) sometimes change; documents may have been moved or removed or otherwise have become inaccessible on the Web after the preparation of this bibliography. Some were not checked during editing.
4. This edition has been slightly reorganized from its original October 2000 version. As it reflects the work of many contributors, there may be some remaining format inconsistencies within the document.
5. A few sections or subsections appear under more than one Committee, where the subject is pertinent to multiple jurisdictions.

CALIFORNIA'S ECONOMY AND POPULATION

California Economy

- “Performing Miracles.” *The Economist*, June 7, 2000.
- Blinder, Alan S. *The Internet and the New Economy*. Policy Brief no 60. Washington, D.C.: The Brookings Institution, June 2000.
