## *Acknowledgements*

The author would like to thank Trina Dangberg for her assistance in preparing this report.

## *Data Sources*

U.S. Census Bureau, Census 2000 redistricting data (Public Law 94-171) summary files, Tables P001 and P002.

Race and Latino origin data by California political districts are obtained by aggregating census block data using 2001 district boundaries. Census 2000 race/ethnicity data for political districts are available at the web site of the Statewide Database, University of California at Berkeley: <http://swdb.berkeley.edu/reports/census/RacebyDistrict.html>. Census 2000 data for Congressional districts using 2001 district boundaries will be released by the U.S. Census Bureau in 2003 and will be available at <http://www.census.gov/>. As of December 2002, Census 2000 data for Congressional districts are only available on the Census Bureau web site using 1991 district lines. The author would like to thank Dr. Elias Lopez of the California Research Bureau for aggregating the “Race alone or in combination” data by Assembly and Senate districts.

## *Note from the Author*

An earlier version of this document was presented at “Uses of the Census – A Program for Legislative Staff,” a program sponsored by the Senate Office of Research on October 25, 2002.

## *About the Author*

Dr. Martha Jones has had a long-standing interest in census issues. In 1990, she served as a demographic consultant to the U.S. Department of Commerce concerning the decision whether the 1990 census count should be adjusted for the undercount. In 2000, she was employed by the California Department of Finance, Demographic Research Unit, providing demographic and technical support to the Census 2000 outreach effort and the California Complete Count Committee. Dr. Jones has worked as a policy analyst for the California Research Bureau for the past two years.

## *Internet Access*

This paper is also available through the Internet at the California State Library’s home page ([www.library.ca.gov](http://www.library.ca.gov)) under CRB Reports.

## INTRODUCTION

We frequently get questions from legislative offices about the demographic characteristics of Senate and Assembly districts, and sometimes of Congressional districts. This report distills and summarizes some of the most basic information about the racial and ethnic composition of these districts. It reports the number of people falling into several racial and ethnic categories in each district, the percentage of people in each category in each district, and includes tables ranking the districts by their racial and ethnic characteristics.

## THE WAYS THE CENSUS BUREAU REPORTS RACE AND ETHNICITY

The Census Bureau has struggled with the concepts of race and ethnicity for some decades. One of the most important changes in Census 2000 was the revision of the question on race to better reflect the country's growing diversity. For the first time, respondents were allowed to select one or more race categories. The overwhelming majority of the U.S. population (97.6 percent) reported only one race. In California, 95.3 percent of the population chose only one race category.

Unlike the State of California, which counts Latinos as a race group, the federal government considers race and Latino origin to be two separate and distinct concepts.<sup>1</sup> Latino origin is considered an ethnicity, not a race. A person of Latino origin can be of any race. On the Census 2000 questionnaire, the following two questions were asked of every individual:

**(1) Latino Origin Question:** Is this person Spanish/Hispanic/Latino?

The Latino origin question was answered "yes" or "no." If the respondent answered "yes," the opportunity was given to specify the type of Latino origin, such as Cuban, Puerto Rican, Mexican, or other Spanish Origin.

**(2) Race Question:** What is this person's race?

The race question had the following major race categories to choose from:<sup>2</sup>

1. White
2. Black or African American
3. American Indian or Alaska Native
4. Asian
5. Native Hawaiian or Other Pacific Islander
6. "Some Other Race" was also listed as a race category in Census 2000 for respondents unable to identify with any of the first five race categories. Most respondents who reported "Some Other Race" were Latinos.

---

<sup>1</sup> State of California, Department of Finance, *Race/Ethnic Population Estimates: Components of Change for California Counties, April 1990 to July 1999*. Sacramento, California, March 2001.

<http://www.dof.ca.gov/HTML/DEMOGRAP/Race-eth.xls>

<sup>2</sup> The guidelines established by the Office of Management and Budget (OMB) in October 1997 require federal agencies to use a minimum of the first 5 race categories listed here. In Census 2000, respondents were also given the opportunity to choose from 15 detailed race categories (such as Chinese) and three write-in answers (for Indian tribe, for example).

Because the federal government in Census 2000 (1) counted Latinos as an ethnicity, not a race, and (2) allowed people to choose more than one race category, there are a variety of ways to count the number of people in each race group. This report considers the following three methods:

**Method #1:** The **Latino origin/race** method blends the census ethnicity and race questions, effectively counting Latinos as a race category.<sup>3</sup> This method counts Latinos as one group and then classifies non-Latinos by racial group. The non-Latino race counts using this method are lower than the counts using the other two methods, because Latinos have been subtracted from each race category. The number of persons of Latino origin, plus the counts of non-Latinos by race, sum to the total population.<sup>4</sup>

Methods #2 and #3 do not identify Latinos as a race group:

**Method #2:** The **“Race Alone”** method places those people choosing only one race in the category that they marked. Those identifying with more than one race are grouped in the “Population of two or more races” category. The sum of all categories is equal to the total population.

**Method #3:** The **“Race Alone or In Combination”** method counts all of the tallies for race, including multiple responses. For example, if one person marked both White and Native American, that would count as two responses. This method produces a number that is greater than the total population and should not be thought of as a population count. Rather, this total tells us about the number of respondents who identify themselves with each race, even if they identify more than one racial group.

The tables presented in this report are summarized below. The data are presented for the new political district boundaries adopted in 2001:

- 80 Assembly Districts,
- 40 Senate Districts, and
- 53 U.S. Congressional Districts (107<sup>th</sup> Congress).

For the State of California, *Table 1a* shows aggregate figures for the three methods of counting race and Latino origin; *Table 1b* presents more detailed categories for Latino origin and also shows population percentages for all methods. *Table 1c* shows district averages for each counting method. These averages were calculated by dividing the California totals in *Table 1a* by the number of districts.

---

<sup>3</sup> This method gives preferences to the Latino category over the race categories. For example, it puts a respondent whose ethnicity was Latino and whose race was African American into the Latino category.

<sup>4</sup> This general method of classifying Latinos as a racial group is used in official population data published by the California Department of Finance as well as demographic data for school children published by the California Department of Education.

Using Method #1, Tables 2 and 3 divide district populations into the population of Latino origin and the population not of Latino origin. Non-Latinos are then classified by race.

- **Table 2** shows the number of persons by Latino origin/race.
- **Table 3** shows the percentage of the population by Latino origin/race.

**Table 4** summarizes the district population rankings in Table 5. For each race group, the district with the maximum, median, and minimum population is identified. Using Methods #1 and #2, these summary rankings are given for the “Race Alone” groups and for the two largest “Latino origin/race” groups: (1) Latino origin and (2) White, not of Latino origin.

**Table 5** ranks districts by the population size of each “Race alone” group and the two largest Latino origin groups. Districts are ranked in descending order, from the district with the largest number of persons in each group to the smallest. Maximum, median, and minimum population totals for each race group are included in the shaded areas of the tables.

**District maps** are included for Assembly, Senate, and Congressional districts using 2001 boundaries.

Using Method #2, Tables 6 and 7 show “Race alone” population counts for districts.

- **Table 6** shows the number of persons by “Race alone” category.
- **Table 7** shows the percentage of the population by “Race alone” category.

Using Method #3, **Table 8** shows “Race alone or in combination” population counts for Assembly and Senate districts.

**Table 9** calculates the difference between the lowest race counts (Latino origin/race) and the highest race counts (Race alone or in combination) for Assembly and Senate districts.

**TABLE 1: CALIFORNIA POPULATION BY RACE AND LATINO ORIGIN**

**TABLE 1A: COMPARISON OF THREE COUNTING METHODS**

	#1 Latino Origin/Race	#2 Race Alone	#3 Race Alone or in Combination
Latino Origin	10,966,556		
White	15,816,790	20,170,059	21,490,973
Black or African American	2,181,926	2,263,882	2,513,041
American Indian and Alaska Native	178,984	333,346	627,562
Asian	3,648,860	3,697,513	4,155,685
Native Hawaiian and Other Pacific Islander	103,736	116,961	221,458
Some other race	71,681	5,682,241	6,575,625
Two or more races	903,115	1,607,646	
Total Population	33,871,648	33,871,648	
Total Tallies			35,584,344

Comparing “Latino Origin/Race” with “Race Alone”

- When answering the Census 2000 question on race, most Latinos chose White or Some Other Race. Of the 11 million Latinos in California, about 4.4 million chose White and 5.6 million chose Some Other Race.
- Almost half of those who chose American Indian and Alaska Native were also Latinos.

Comparing “Race Alone” and “Race Alone or in Combination”

- The two racial groups that increase the most relative to their own size when people are allowed to check multiple race categories are American Indians and Native Hawaiians. These race groups almost double in size when combinations of races are counted.
- The largest absolute number of multiple race responses is among Whites. About 1.3 million Whites checked more than one race. In addition, almost a million people who checked Some Other Race also checked another race group as well.

Comparing “Latino Origin/Race” and “Race Alone or in Combination”

- For Whites and Some Other Race, the “Race Alone or in Combination” counts are about 6 million people higher than the “Latino Origin/Race” counts.
- Relative to their own size, the race groups most affected by the method of counting are: (1) American Indian and Alaska Native and (2) Some Other Race.
- The race group counts that change the least across all methods of counting are (1) Black or African American and (2) Asian.

**TABLE 1B: COMPARISONS AND PERCENTAGE CALCULATIONS**

	<u>POPULATION</u>	<u>PERCENT</u>
<b>California</b>	<b>33,871,648</b>	<b>100.0</b>
<b>LATINO ORIGIN/RACE</b>		
Hispanic or Latino Origin	10,966,556	32.4
Mexican	8,455,926	25.0
Puerto Rican	140,570	0.4
Cuban	72,286	0.2
Other Hispanic or Latino	2,297,774	6.8
Not Hispanic or Latino Origin	22,905,092	67.6
One Race		
White, not Latino Origin	15,816,790	46.7
Black, not Latino Origin	2,181,926	6.4
American Indian, not Latino Origin	178,984	0.5
Asian, not Latino Origin	3,648,860	10.8
Native Hawaiian, not Latino Origin	103,736	0.3
Some other race, not Latino Origin	71,681	0.2
Two or more races, not Latino Origin	903,115	2.7
<b>RACE ALONE<sup>5</sup></b>		
Population of one Race	32,264,002	95.3
White	20,170,059	59.5
Black or African American	2,263,882	6.7
American Indian and Alaska Native	333,346	1.0
Asian	3,697,513	10.9
Native Hawaiian and Other Pacific Islander	116,961	0.3
Some other race	5,682,241	16.8
Population of two or more races	1,607,646	4.7
<b>RACE ALONE OR IN COMBINATION WITH ONE OR MORE RACES<sup>6</sup></b>		
White	21,490,973	63.4
Black or African American	2,513,041	7.4
American Indian and Alaska Native	627,562	1.9
Asian	4,155,685	12.3
Native Hawaiian and Other Pacific Islander	221,458	0.7
Some other race	6,575,625	19.4

<sup>5</sup> For the first time in Census 2000, respondents were allowed to choose more than one race. The "population of one race" tallies responses with one race checked.

<sup>6</sup> The following six numbers add to more than the total population and the six percentages add to more than 100 percent because individuals may report more than one race.

**TABLE 1C: DISTRICT AVERAGES, THREE COUNTING METHODS**

<b>AVERAGE DISTRICT SIZE</b>	<b>#1 Latino Origin/Race</b>	<b>#2 Race Alone</b>	<b>#3 Race Alone or in Combination</b>
<b>80 ASSEMBLY DISTRICTS</b>
