

Highlights

**Population Growth:** Over the last decade, the population of Redondo Beach increased by 6% to 67,000, while California grew by 10%. Hispanics, Asians, and blacks all increased in number, while the white, non-Hispanic population decreased by 1,000 (-3%).

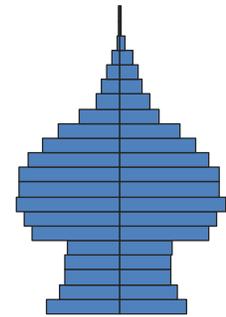

**Diversity:** Although the white, non-Hispanic population decreased it remains the majority, making up 65% of total population, down from 71% in 2000. Over the same period, the Asian population grew from 9% to 12% of total, and the Hispanic share of population increased slightly from 13% to 15% of total.

**Age Structure:** The population of Redondo Beach is older than the population of California as a whole. Over the past decade, the median age increased from 37 to 39, compared with the state median age of 35. People age 65+ now make up 10% of the total population in Redondo Beach, the same as the share statewide.

**Households:** The household mix showed only small changes in the last ten years. Redondo Beach continues to have a larger than average share of single-person households, 32% compared with 23% statewide. The share of traditional families—married couples with children—increased slightly from 18% to 19%, though this is still below the statewide share of 23%.

**Education:** Educational attainment in Redondo Beach is much higher than in California as a whole. Fifty-six percent of adults have a Bachelor’s degree or higher, compared with 30% statewide, and only 4% have not completed high school, compared with 20% of adults in California.

**Income:** Median household income in Redondo Beach is \$92,000, 53% higher than the state median. Almost 47% of households have incomes of \$100,000 or higher, compared with 27% statewide.
