

Highlights

Population by Age

**Population Growth:** The total population in South Pasadena increased by 6% over the past decade to 26,000—a growth rate lower than that of the state overall (10%). The greatest increase occurred in the Asian population (1,000), and the greatest decline occurred in the white, non-Hispanic population (1,000).

**Diversity:** The racial and ethnic composition of South Pasadena shifted over the past decade, with the white, non-Hispanic share of the population decreasing from 51% to 44%, the Asian share increasing from 26% to 31%, and the Hispanic share increasing from 16% to 19%.

**Age Structure:** South Pasadena’s median age increased from 37 to 40 over the past decade, and is significantly higher than the statewide median of 35. Median age varies by racial and ethnic group—it stands at 44 for white, non-Hispanics, compared with just 34 for Hispanics.

**Education:** Educational attainment is higher than in the state overall. Just 4% of adults have not completed high school, compared with 20% of adults statewide, and 63% have attained a Bachelor’s degree or higher, more than double the 30% California figure.

**Income:** Median household income is \$80,000, which is 33% higher than the state median. Unemployment was only 6% as of June 2011, half the statewide rate.

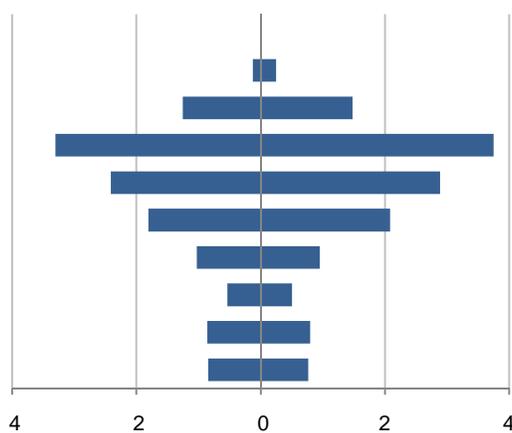

**Foreign Born:** Foreign-born individuals represent 28% of South Pasadena’s population. While this is comparable to the statewide figure, the share of immigrants from Asia, at 68%, is double the statewide share.
