## *What's the FDLP?*

The California State Library has been a Federal Depository Library since 1895.

The Federal Depository Library Program (FDLP) was created by Congress in 1895 to provide authentic, accurate federal government information to the public.

Since 1962, the California State Library has operated as an FDLP regional depository, coordinating and overseeing the depository activities of California's 71 selective depositories throughout the state.
