California State Library Reimages History – in Stereo 3D at the State Fair

Sacramento, Calif. – The California State Library’s extensive collection of 3D stereo images will be featured at the California State Fair, Sunday, July 27, 10am to 9pm in the Industrial and Technology Education Exhibit Building.

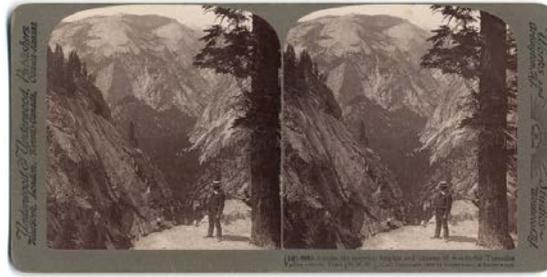

Stereo-view card - State Capitol under construction in 1868

On this final day of the 161st annual State Fair, which also honors veterans and peace officers, fair goers will be allowed to experience a visual 3D tour of the Golden State’s past to its present. There’s a dizzying array of historical California images from the library’s stereo-view card collection demonstrated here.

Stereo-view card - US Marines, Mare Island Navy Yard, CA circa 1898

Stereo-view card -Amid majestic heights and chasms of Yosemite Valley, circa 1890s

Check out more of the 3D collections here: [3D collection 1](#), [3D Collection 2](#).

Fair goers will learn on how stereo 3D works, how to take your own 3D pictures, and how to edit and view stereo 3D imagery. And, of course, the library will have its very own super-cool 3D glasses to see the images the way they're supposed to be seen.

This is the California State Library's first 3D exhibit at the State Fair.
