Launch into STAR Net’s “Summer of Space”!

CSLP, the STAR Library Network (STAR Net) with its NASA@ My Library program, and NASA are working together on a virtual launch pad filled with numerous STEM resources that libraries can utilize for their celebration of space exploration as part the 2019 “Universe of Stories” summer learning event.

STAR Net’s “Summer of Space” website provides your library with valuable tools to help your summer learning program achieve great success. Public Libraries can register and become eligible to receive additional STEM resources, build partnerships between libraries, enter to win valuable giveaways, and get in contact with space experts.
